Task 29

In databases, create tables, connections between them and fill them with data. Requirements:

a)	Universities table with Id, UniName, City columns. One or more universities in the name must contain the letter U (LNU, ChNU)	https://app.screencast.com/CbwbKwU0zajNT	https://app.screencast.com/bUNwmPVZopMHZ
b)	Faculties table with Id, Name, UniversityId columns (bound by foreign key to the Universities table)	https://app.screencast.com/S8bJtnZpXmroX	https://app.screencast.com/bUNwmPVZopMHZ
c)	Groups table with Id, GroupNumber, FacultyId columns (bound by a foreign key to the table Faculties). When filling out, take into account that the group numbers depend on the course. The first digit of the group always indicates a course (1 course = 102, 103, etc group). Create one or two groups for each (1- 5) course	https://app.screencast.com/sUBjYI7hnCHxQ	https://app.screencast.com/rLqYj86Ci7P6g
d)	Students table with Id, Name, Surname, Age, GroupId columns (linked foreign key to the Groups table). When filling the table, create one student named Ivan	https://app.screencast.com/gkplRwjETW8d1	https://app.screencast.com/ahocuVoudmJxE
